Acknowledgments

This work would not have been possible without the cooperation of the local authorities of the municipality of Jiutepec. They have shown an incredible amount of support and trust. I would like to acknowledge in particular the support of Ing. Ernesto Jimenez Tovar from the Municipality of Jiutepec, Biol. Rosalba Sandoval Araiza, consultant of the Department of Ecology of Jiutepec, Biol. Julio Cesar Lara Manrique from the University of the State of Morelos, Mrs. Luisa Rivera Izabal and Mrs. Monica Romero.

I would like to acknowledge the participation of all the actors involved in the data collection, specially the interviewees and the members of the public service and sanitary department of Jiutepec. My sincere appreciation goes to the local residents who I have met during the field trip of 2007 and who have contributed to this work in so many ways.
